EDUCATION

Oregon State University

Corvallis, OR

Master of Science in Artificial Intelligence (Concurrent)

Sept. 2025 – June 2028 (Expected)

Bachelor of Science in Computer Science, Minor in Mathematics

Sept. 2023 – June 2027 (Expected)

- Accelerated Master's Platform (AMP) Student
- 3.8/4.0 GPA — 4x Dean's List Recipient
- **Relevant Coursework:** Machine Learning & Data Mining, Intro to Artificial Intelligence, Data Structures, Analysis of Algorithms, Operating Systems, Web Development, Databases, Parallel Programming

EXPERIENCE

Full-stack Developer

May 2025 – Present

BeaverHacks – OSU Hackathon Club

Corvallis, OR

- Collaborated with a team of 5+ developers to engineer a full-stack portal for Oregon State's BeaverHacks program, serving as the central hub for event registration, team formation, and project submissions.
- Developed dynamic, role-based dashboards using Next.js and TypeScript for participants, judges, and organizers, improving user engagement and administrative efficiency.
- Implemented a secure back-end with RESTful APIs using Prisma ORM to manage user authentication, project data, and the real-time judging process.

Eco Representative

Oct. 2024 – June 2025

Oregon State University - University Housing and Dining Services

Corvallis, OR

- Served as the sole sustainability leader for 200+ residents, driving engagement through peer education and environmental program management as part of a team initiative that achieved over 14,000 student interactions.
- Established Tennis Ball Recycling program – prevented 50+ pounds of tennis balls from reaching landfills

Tennis Coach

June 2023 – Sept. 2023

Eugene Swim and Tennis Club

Eugene, OR

- Instructed youth athletes aged 4-17 in fundamental tennis mechanics, on-court mentality, and physical fitness in a dynamic summer camp environment.

PROJECTS

Speech-to-Text AI Note Converter | *React.js, Express.js, MongoDB, Web Speech API*

- Architected a full-stack solution that captures and converts audio input into structured text notes, featuring a responsive user interface built with React.js and a RESTful API powered by Express.js.
- Leveraged the Web Speech API to perform real-time voice transcription directly in the browser, providing users with instant visual feedback as they speak.
- Established a data persistence layer using MongoDB, enabling users to securely save, access, and manage their transcribed notes across multiple sessions.

Mafia Game Website | *Node.js, Socket.io, Handlebars, JavaScript, HTML/CSS*

- In a team of four, engineered the core back-end logic for a real-time multiplayer game using Node.js and Socket.io, implementing a state machine to manage turn-based game phases, player roles, and win conditions.
- Developed the dynamic front-end interface using Handlebars to display role-specific views and actions, and integrated a live chat and voting system to facilitate player interaction.

Lego Art Mosaic Creator | *Python, Matplotlib, Numpy*

- Developed a back-end Python application using numpy
- Allows user to upload any image of any size
- App creates Lego Instructions based on the closest Lego stud color to create pixelized Lego Art.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C/C++, HTML/CSS, R

Frameworks & Libraries: Next.js, React.js, Node.js, Prisma ORM, Tailwind CSS, Express.js, MongoDB, NumPy, Matplotlib

HPC & Parallel Computing: CUDA, OpenMP, MPI, OpenCL, SIMD
